1. The Electric Lamp Factory of Shanghai, a state industry, is now making electric bulbs with a Chinese-made tungsten filament.
2. About three years ago, one first began to hear about experiments in alloying tungsten with copper, silver and carbon. If the Chinese engineers really have succeeded in alloying tungsten, Chinese industry has made a remarkable forward stride. Chinese work with tungsten is something new.
3. The tungsten alloys are made in an establishment to the north of Shanghai.
